

Parallels® Plesk Panel Power Pack

Data Sheet

Parallels Plesk Panel Power Pack

Parallels Plesk Panel Power Pack extends Panel capabilities with high-value add-ons for web presence, social media integration, e-commerce, mobility, security, remote server management, and more.

With Power Pack, users can quickly build professional websites that can be e-commerce enabled, copied to Facebook, integrated with other social media services, and customized for access on mobile devices.

Panel administrators will also enjoy server side email antivirus protection, support for popular web and database technologies, and remote server monitoring management via smartphones and tablets.

With Power Pack you can:

Quickly Create Websites Integrated with Social Media

Parallels Web Presence Builder helps small businesses quickly and cost-effectively design and update an online web presence that includes integrated social media, e-commerce and mobility.

It features pre-built templates that include content, images, and site structures for more than 100 types of businesses and organizations – enabling anyone to set up a complete, professional-looking website in record time.

Drag-and-drop modules enable anyone to easily customize websites, publish them to Facebook, and let visitors share content on popular social networks including Facebook, Twitter, and LinkedIn. It also lets you easily integrate with a wide variety of external services including ecommerce, image galleries, streaming video services and web analytics.

New in Power Pack, Web Presence Builder includes licensing to design and publish ten Web Presence Builder websites. Additional capacity can be added with a Web Presence Builder 100 or 1000 website license.

Monitor and Manage Servers From a Smartphone or Tablet

Parallels Plesk Panel Mobile Server Manager gives administrators access to the most important information about their Parallels Panel servers and control over core administrative functions from selected smartphones and tablets including iPhone, iPad, Android and BlackBerry devices.

Manage servers remotely on a smartphone or tablet using the Mobile Server Manager app.

Design professional looking websites and copy them to Facebook with Parallels Web Presence Builder.

Protect your users from viruses and other malicious intrusions

Kaspersky Antivirus is award-winning e-mail antivirus scanning software from Kaspersky Labs that combines traditional anti-virus defense methods with the latest proactive technologies to provide solid and dependable protection against malicious programs, viruses, spyware, Trojan viruses, worms, and keyloggers. Power Pack includes 5 mailbox licenses for Kaspersky Antivirus.

Easily Render Websites for Mobile Devices

UNITY Mobile is an extremely powerful yet easy-to-use platform that enables any organization to create, publish, and manage mobile websites. Power Pack includes 2 domain licenses for UNITY Mobile licenses.

Let Developers have the best Java tools

Tomcat is the Servlet container that provides the environment for executing Java Servlets. The Tomcat add-on supports deploying and managing Tomcat web applications allowing users to set up hosting with JSP support. This support allows you to deploy a wide range of Java based applications.

Make customers stickier with a ColdFusion environment

ColdFusion is one of the most popular development environments on the market. When an application uses ColdFusion, the end customer sticks with it longer. Using this add-on module, admins can configure ColdFusion paths and enable/disable ColdFusion support in the setup.

Support popular databases

PostgreSQL or **MSSQL** add-ons include web-based database administration software (like phpPgAdmin), giving users remote access to their databases. With one of the world's most advanced relational database management systems, Power Pack enables users to deploy and manage databases right from the user interface with a few clicks.
