SUMMIT 2

A scenic mountain landscape featuring a wooden cabin in the foreground, snow-capped peaks in the background, and a bright sun in the upper left corner. The cabin is a simple, rustic structure with a dark roof and light-colored walls, situated on a rocky, snow-dusted slope. The background shows a vast mountain range with rugged, snow-covered peaks and a deep valley. The sky is clear and blue, with the sun creating a bright glow and lens flare effect. The overall atmosphere is serene and majestic.

FOR TOMORROW BELONGS TO THE

How did we identify the VAR opportunity?

Deploy Parallels Automation!

Gain access to the product roadmap of a multinational software company that is strategically aligned with our success.

How did we identify the VAR opportunity?

So, our VAR story begins with Parallels Automation being selected to solve our biggest strategic threats.

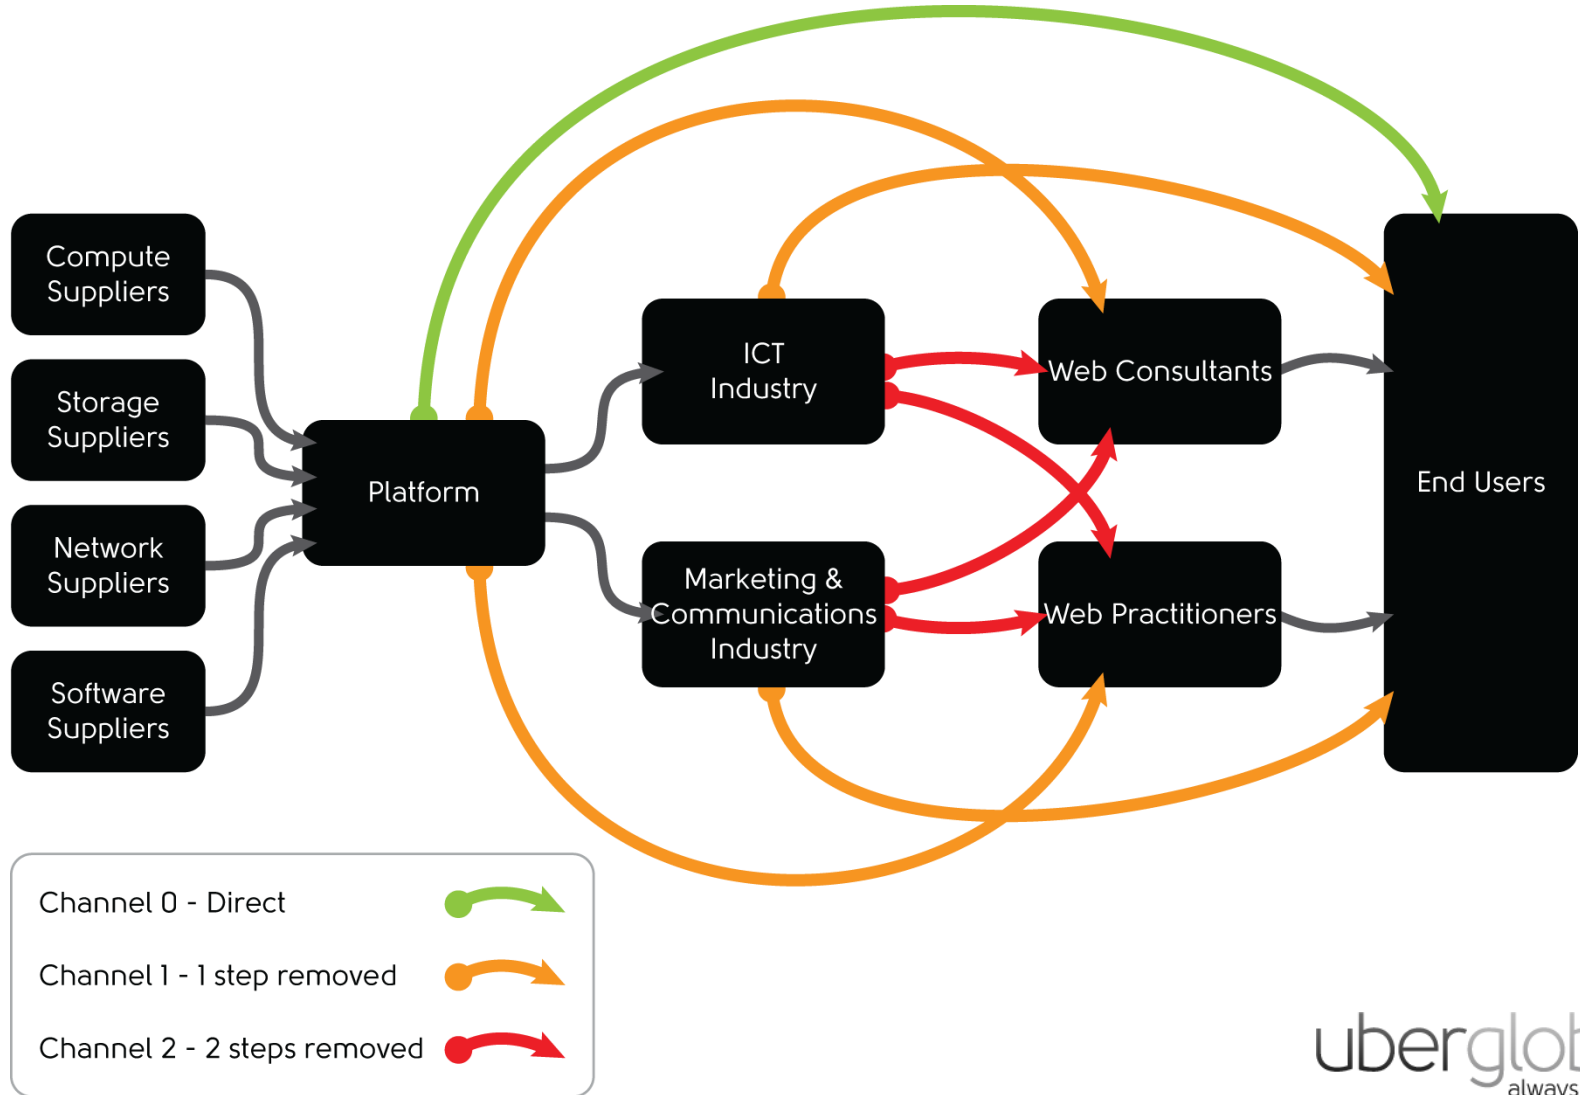

- How do we remain competitive in a global technology services business?
- How do we remain relevant to key suppliers?
- How do we place our customers 'always ahead'?

In mitigating this threat we were very aware that we'd also generated a strategic opportunity to enable our own domain and shared hosting resellers with a broader set of products and a complete turnkey platform for cloud services.
