CLOUD₄

Virtual Datacenter Solution

Cloud in 10 minutes

1st cloud stands for operational value

Where does cloud bring operational value?

1. Capacity planning do more with less

2. Repeatable processes fast easy deployment

3. Policy driven automation of processes

2nd cloud stands for financial impact

1. Reduction of cost  per rack, power, cooling
2. Better Utilization  pay per use.. no waste capacity
3. No more Asset management  shift capex to opex

3rd cloud stands for business value

Business value

1. Faster time to market  shorter test development

2. Business continuity  no money lost on outages

3. Agility  grow on demand and in line with revenue

Bottom line focus on core business and make more profit!

4th cloud stands for **mesh**
