

# Parallels Desktop for Chromebook Enterprise 1.0.5

*Available for Chrome OS 89*

This update for Parallels Desktop for Chromebook Enterprise includes the following enhancements:

- Parallels Desktop can now be installed and used on Dell Latitude 7410 Chromebooks.
- A warning in the title bar indicates that Parallels Tools are not installed. Clicking the warning initiates the Parallels Tools installation.

Parallels Tools is a set of drivers and utilities that provide a user with various productivity enhancements. For example, the clipboard is shared between Chrome OS and Windows, Windows resolution adjusts automatically when you resize the virtual machine window, the keyboard and mouse input is captured and released automatically when you click inside and outside the virtual machine window, and many more.

# Parallels Desktop for Chromebook Enterprise 1.0.4

*Available for Chrome OS 88*

This update for Parallels Desktop for Chromebook Enterprise includes the following enhancements:

- Parallels Desktop can now be used on HP Chromebox G3 Enterprise.
- When you open the Microsoft Office dashboard in the Chrome browser, right-click some document and select the “Open in Desktop App” option, the document opens in the corresponding Microsoft Office app installed in Windows.

# Parallels Desktop for Chromebook Enterprise 1.0.3

*Available for Chrome OS 87*

This update for Parallels Desktop for Chromebook Enterprise includes the following improvements:

- Optimized memory allocation:

On Chrome devices with less than 8 GB of memory, a Windows virtual machine is allocated 2 GB of RAM.

On Chrome devices with 8 GB of memory or more, but less than 16 GB, a Windows virtual machine is allocated 3 GB of RAM.

On Chrome devices with 16 GB of memory or more, a Windows virtual machine is allocated 4 GB of RAM.

- When you connect some USB devices, such as Smart Card Readers, Android phones or Arduino boards to a Chromebook, you can choose whether to connect them to Chrome OS or directly to Windows.

You can also set to connect them directly to Windows in the Parallels Desktop configuration pane.

Please note that a mouse, keyboard, camera, audio and storage devices are connected to Chrome OS and there is no way to connect them to Windows.

- Improved resolution and crispness when Windows is used on an external monitor or a non-default scale factor is set in Chrome OS.

## Parallels Desktop for Chromebook Enterprise 1.0.2

*Available for Chrome OS 86*

This update for Parallels Desktop for Chromebook Enterprise includes the following improvements:

- Automatic CPU assignment:  
On Chrome devices with 4 logical cores or less (logical = counting Hyper-Threading), a Windows virtual machine is allocated 2 virtual CPUs.  
On Chrome devices with more than 4 logical cores, a Windows virtual machine is allocated 4 virtual CPUs.
- Automatic RAM assignment:  
On Chrome devices with less than 16 GB of memory, a Windows virtual machine is allocated 2 GB of RAM.  
On Chrome devices with 16 GB of memory or more, a Windows virtual machine is allocated 3 GB of RAM.
- Use Touchpad and Touch Screen gestures to zoom in/out content in Windows applications.
- Copy and paste images greater than 2 MB from Chrome OS to Windows and vice versa.

# Parallels Desktop for Chromebook Enterprise 1.0.1

*Available for Chrome OS 85*

Run proprietary and full-featured Windows applications, including native Microsoft Office, on Chromebook Enterprise devices — online and offline.

Always-on access to business-critical Windows apps:

- Effortlessly switch between Chrome OS and Windows – no need to reboot.
- Suspend and Resume Windows to instantly get back up and running.
- Open files on Chrome OS using Windows applications.

Work that is ready whenever, wherever:

- Utilize the full feature sets of desktop applications including Word, Excel, PowerPoint and more.
- Access Windows Desktop, Documents, Downloads, and custom folders from Chrome OS Files.
- No internet? No problem! Files and apps are fully accessible both online and offline.

Chrome OS integration for a familiar & friendly experience:

- Easily move content between Chrome OS and Windows via shared clipboard.
- Print from Windows to supported printers.
- Stay in the flow with seamless mouse, audio & docking.
- Enjoy the view with dynamic resolution and full-screen support.

Deploy and manage fast & at scale right from the Google Admin Console. Specify a link to a Windows virtual machine and enable it for the selected business unit(s) — it is as simple as that.

Rich documentation for administrators and users along with premium Parallels support ensure positive experiences and productive output across the organization.
